### **ILLICITLY MANUFACTURED FENTANYL**

Illicitly manufactured fentanyl (IMF) is available on the drug market in different forms, including liquid and powder. Fentanyl-laced drugs are extremely dangerous, and many people may be unaware that their drugs are laced with fentanyl.

Powdered fentanyl looks just like many other drugs. It is commonly mixed with drugs like heroin, cocaine, and methamphetamine and made into pills that are made to resemble other prescription opioids.

In its liquid form, IMF can be found in nasal sprays, eye drops, or dropped onto paper like small candies.
